The Problem

Money & Mental Health Trapped in a Toxic Feedback Loop

- Traditional finance apps are blind to emotion
- Financial shame drives avoidance
- Emotional spending escalates debt

Why It Matters

Existing Tools Punish Users Instead of Supporting Them

- Severe mental health toll
- High app abandonment
- Unaddressed market need

Our Solution

Empathetic, Automated Financial Intervention

- A novel behavioral fintech app
- Real-time support over shame
- Adaptive financial logic

How Nudge Works

From Daily Telemetry to Smart Action in 4 Steps

Low Friction Telemetry

5-second daily check-in logs 1 to 10 scores for Stress, Mood, and Energy

Anomaly Detection Engine

Algorithms analyze real-time telemetry to flag high-risk emotional states

Optimization Actions ("Nudges")

Nudge deploys automatic optimization actions that nudges customers into financial and mental health success

Dynamic User Reporting

Real-time dashboarding displays financial progress and success metrics

Archetype-Driven Optimization

Combining Mental Telemetry & Open Banking Data

- The Impulse Stress-Shopper: Triggers cooling-off balance sweeps and gentle intercept prompts during spending spikes
- The Debt Avoider: Defaults to the Snowball strategy for quick psychological wins
- The Exhausted Convenience Spender: Calculates convenience taxes and routes micro-savings offsets on purchases
- The Executive Dysfunction Planner: Automates bill sweeps and simplifies UI defaults
- The Quantified-Self Optimizer: Activates Avalanche debt optimization and displays dual-axis correlation charts

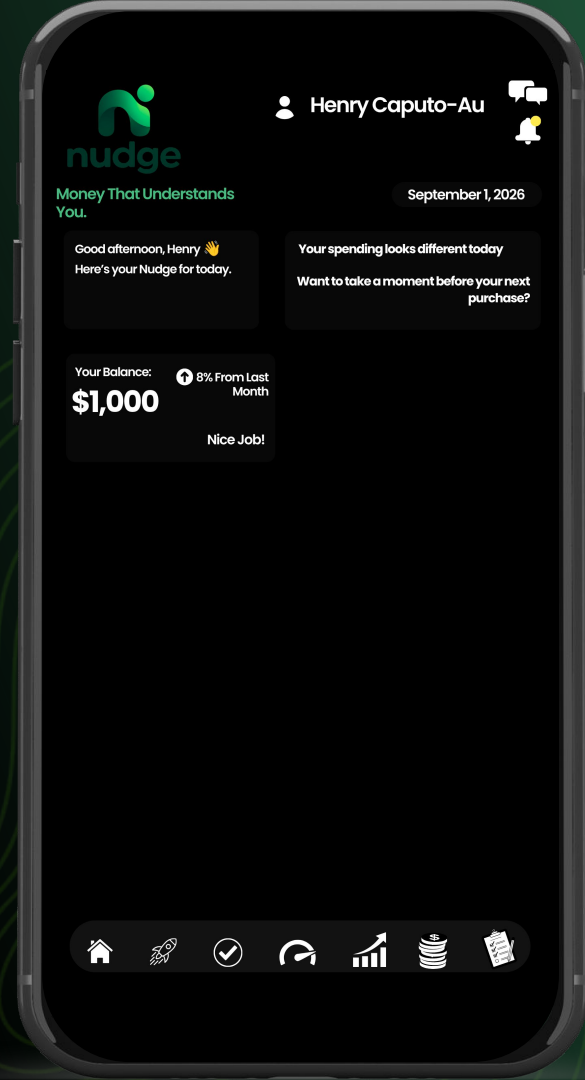

Financial Health Benefits

- Financial benefits
 - Accelerated debt repayment
 - Automated savings growth
 - Controlled overspending
- Mental health benefits
 - Reduced anxiety & shame
 - Lower cognitive load
 - Restored emotional agency
